STORYBOARD - "Discovering clubs through a Digital Flyer Board"

On campus, flyers cover every wall, but no one stops

Sees an event but forgets when it is

Learns about a digital board

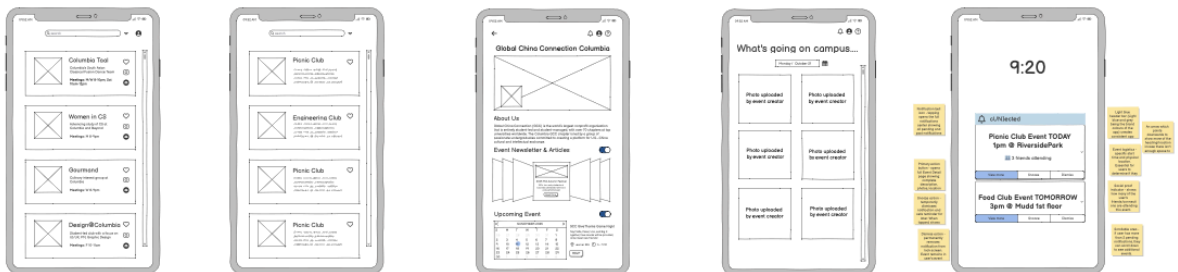

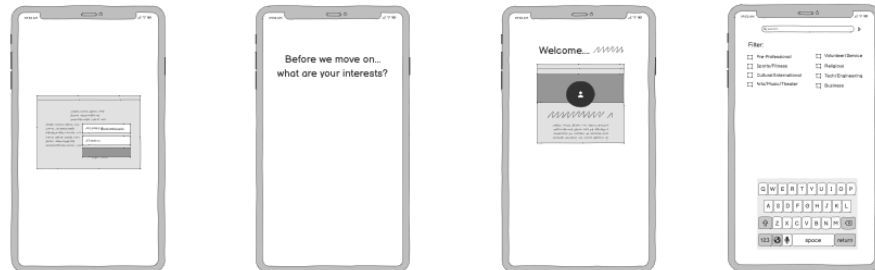

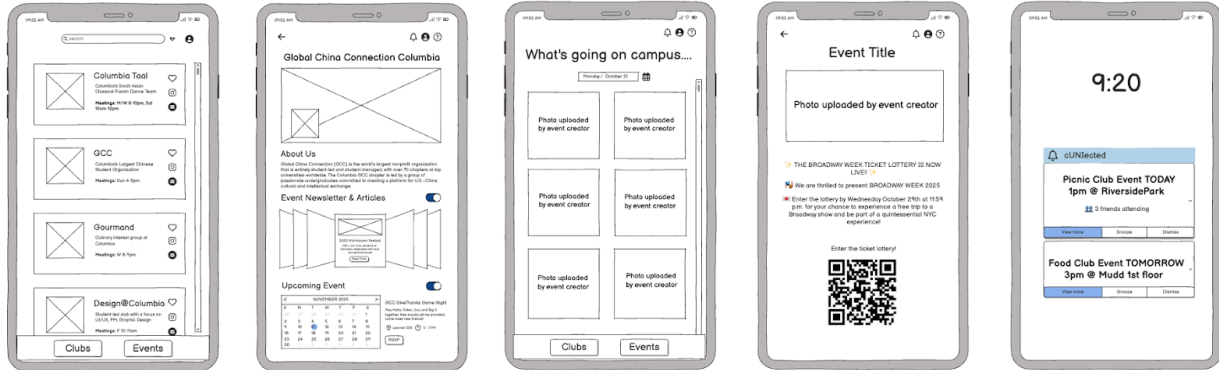

All clubs and events now in one place

Gets notified instantly, no matter where they are

~~computer screen~~

Finally goes to events they like and makes new friends with similar interests

LOW-FIDELITY PROTOTYPE:

1. The user story is a key part of the app that helps the user find the best location for the event.

2. The user story is a key part of the app that helps the user find the best location for the event.

3. The user story is a key part of the app that helps the user find the best location for the event.

4. The user story is a key part of the app that helps the user find the best location for the event.

5. The user story is a key part of the app that helps the user find the best location for the event.

6. The user story is a key part of the app that helps the user find the best location for the event.

7. The user story is a key part of the app that helps the user find the best location for the event.

8. The user story is a key part of the app that helps the user find the best location for the event.

9. The user story is a key part of the app that helps the user find the best location for the event.

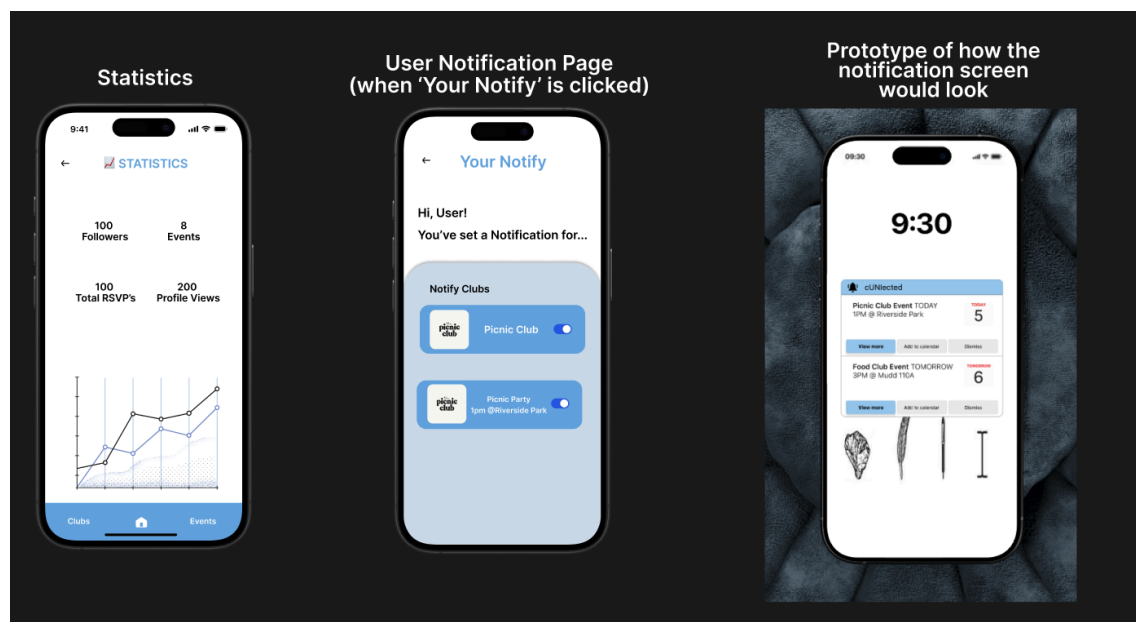

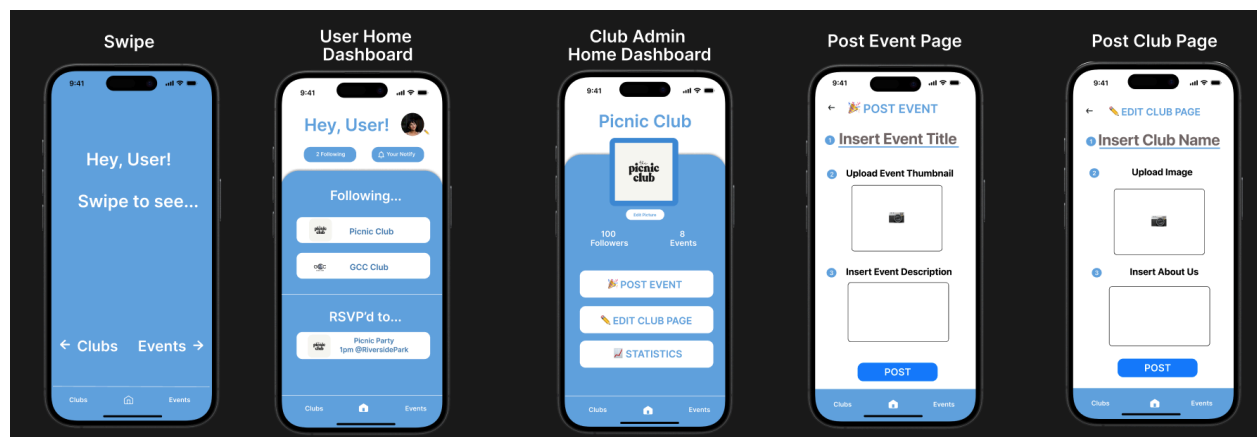

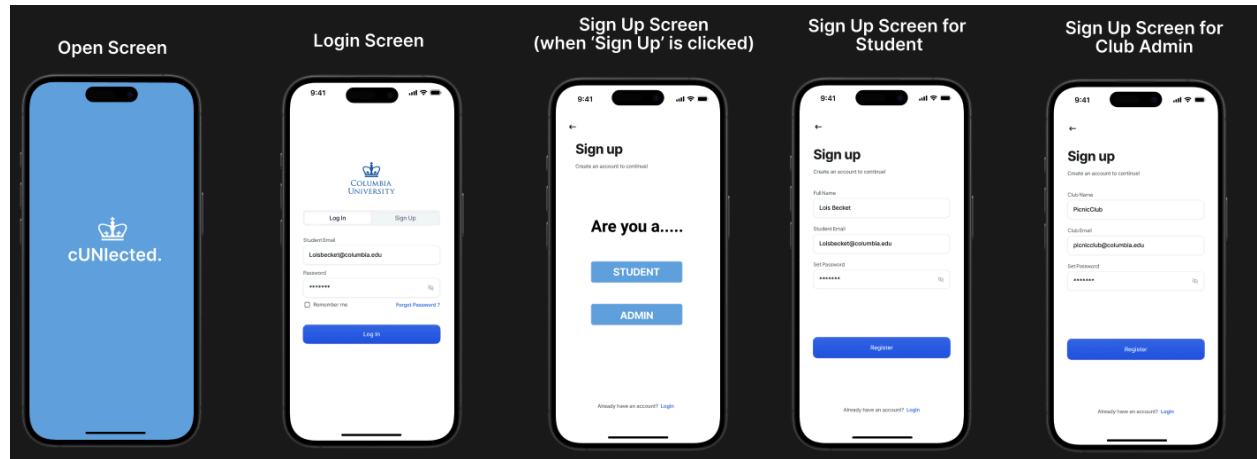

10. The user story is a key part of the app that helps the user find the best location for the event.

What's going on campus...
